Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The applicant's representative requested an after final interview with the examiner to discuss a proposed amendment. The applicant's representative discussed with the examiner the addition of language to claims 1 and 25, wherein the components of the device are arranged such the arm is capable of functioning as a lever. The examiner explained that the added language does not appear to overcome the prior art. The examiner believes that the arm as discussed in the final office action is capable of being used as a lever is the broadest interpretation of the word wherein a lever is a simple machine consisting of a rigid bar pivoted on a fixed point and used to transmit force. The applicant's representative also discussed with the examiner the limitation wherein the arm is capable of pivoting about an axis spaced from and parallel to the base of the device. The examiner explained that the arm as discussed in the final office action is capable of being rotated in the sleeve about an axis that is spaced from and parallel to the base of the device.
